### **REASONS FOR ALLOWANCE**

1. Claims 1, 3-10 allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art made of record fails to teach in combination the method involves using a fault tolerance layer between the communication controller and node controller of a network node that receives the messages exchanged by network nodes. The fault tolerance layer uses received information relating to the state of at least one network node to decide regarding the functioning of the node by a matching technique and outputs a signal for controlling the node or nodes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bianchini, Jr. (US 5,325,518) discloses an adaptive distributed system and method for fault tolerance.

Starovic et al (US 6,625,751 B1) discloses software fault tolerant computer system.

Lennie et al (US 6,092,213) discloses fault tolerant method of maintaining and distributing configuration information in a distributed processing system.

Dittmar et al (US 5,784,547) discloses a method for fault tolerant communication under strictly real-time conditions.
